

ANGIE HOSPITALITY ON-THE-GO GUEST APP

Intuitive, voice-enabled mobile app increases guest interaction while decreasing touchpoints and driving incremental revenue

The world's first cloud-powered, interactive guest room assistant created just for hotels is now mobile. The "Angie On-The-Go" app can personalize the guest experience, facilitate touchless guest interactions and eliminate contact points, while increasing guest engagement, customer retention and incremental revenue. Guests can tap into the convenience of Angie, no matter where they are.

The Angie mobile app is also equipped with the same highly intuitive, multilingual voice interface as Angie's in-room devices. The app can be implemented as a standalone solution or in tandem with any of the in-room guest assistants.

ANGIE ON-THE-GO ENHANCES THE ENTIRE GUEST JOURNEY FROM PRE-ARRIVAL TO CHECKOUT:

Pre-Arrival:

As soon as guests make a reservation, they can access the Angie app to pre-register, find hotel information, select room upgrades, book experiences and make pre-arrival requests.

Check-In:

Guests can check in through the app and access mobile key features to get into their rooms.

During the stay:

Guests get intuitive touch or voice-control access to request hotel information and make requests for amenities such as additional towels, order food and book spa appointments or other perks during their stays. Hotels can offer notifications to alert guests to special offers, events and more while staying at the property. Guests can also use the app to control in-room facilities including the thermostat, lights, TV and more.

Check Out:

The Angie app allows guests to check out when they leave. They can also make transportation requests and review billing.

Post-Stay:

Guests can check in through the app and access mobile key features to get into their rooms.
