ANGIE CASTING

Secure and Easy In-Room Entertainment Solution for Streaming Directly from Guest Devices

Guests want to watch their own content by casting it directly to the hotel TV as easily as they can at home. Whether it's to watch the latest Netflix episode, to work out, listen to music, or stream a business training video, guests want to effortlessly watch their own content without having to remember passwords or log onto a public device. They want a simple, secure and seamless experience.

Other solutions on the market require guests to use the remote to choose from the limited apps available on the hotel TV and then slowly click each letter and number to enter their usernames and passwords for each app used. Then guests need to trust that the hotel will remove these credentials after they leave the property.

Angie Casting allows guests to easily and securely stream preferred media content from their mobile devices onto the in-room TVs.

AVAILABILITY

Angie Casting is generally available globally.

HOW IT WORKS

Angie Casting displays a QR code on the TV screen so guests can simply aim their cameras at the QR code to connect their mobile devices. After that, all guests need to do is choose what they want to watch and select the casting button in the app of the content provider. There are thousands of content options available, not just the limited ones typically offered by other types of casting or streaming solutions.

Through Angie's partnership with Nomadix, guests have the option for automatic connection of guest devices. Nomadix gateways provide authenticated, managed Internet access for millions of hotel rooms at properties all over the world. For those properties with gateways that use the Nomadix Hotel Portal and are integrated with the property management system (PMS), guest devices are automatically recognized and connected to the in-room TVs upon authentication to the Wi-Fi network. No logins or additional steps are needed. The guest can open an app of choice and hit cast to watch shows or other content instantly.

Angie Casting on the in-room TV can also match the brand guidelines of the hotel to provide a consistent guest experience.

FEATURES & BENEFITS

Simplified authentication using an on-screen QR code

Ability to use the mobile device for other functions while casting

Automatic pairing of guest devices at properties leveraging Nomadix Hotel Portal with a PMS integration (Partnership between Angie and Nomadix offerings)

Support for both iOS and Android
